Analysis of March 1, storage holdings and occupancy	. 2
Fresh fruits, vegetables, and nuts in storage	
Dairy products and eggs in storage	
Frozen poultry, fruits, vegetables and juices in storage	
Meats and meat products in storage	. 6
Commodities stored in public general cold storage warehouses	
Apple holdings by States	. 7
Cold Storage holdings, by geographic regions	. 8
Space and occupancy in public general warehouses in selected cities	
Space and occupancy in public general refrigerated warehouses	. 11
United States refrigerated net piling space	. 12

Data for this report are collected from public, private, and semiprivate warehouses, apple houses, and meat-packing plants where food products are generally stored for 30 days or more. Commodities in space owned or leased and operated by the armed services are not reported. February 29, 1900 data are preliminary.

U. S. DEPARTMENT OF AGRICULTURE STATISTICAL REPORTING SERVICE Agricultural Estimates Division
Washington, D. C.
CoSt 1 (3-68)

Commodity Summary

Warehouse stocks of cheese, fresh and frozen fruits and vegetables, frozen eggs, frozen poultry, and total meats, declined during February but stocks of butter, shell eggs, and orange concentrate increased, according to the Crop Reporting Board.

March 1 stocks of fresh apples decreased to 807 million pounds, compared with 1,105 million a month earlier. At this time last year, 967 million pounds were in storage. The 1962-66 average is 874 million pounds. Fresh pears totaled 630 thousand boxes, 532 thousand boxes less than a month earlier and 422 thousand boxes less than a year earlier.

American cheese stocks totaled 310 million pounds, down 16 million from February 1 but 2 million more than on March 1, 1967. The March 1, average is 295 million pounds. A 5-million pound February decline reduced March 1 stocks of frozen eggs to 80 million pounds. Year-earlier holdings totaled 41 million and the average is 40 million pounds.

Reductions in all classes of <u>frozen poultry</u> lowered total stocks to 459 million pounds. The net reduction of 66 million pounds, principally <u>turkeys</u>, compared with

25 million during February 1967 and 44 million, the average decline.

Frozen turkey holdings declined 49 million pounds in February to 312 million pounds. A year-earlier, 254 million pounds were in storage. The average is 182 million pounds. The seasonal decline in frozen fruit holdings brought March 1 stocks down to 434 million pounds, 37 million less than a year earlier but 13 million above average.

Stocks of frozen vegetables, excluding french fries, were down to 1,072 million pounds. The 136-million pound decrease from a month earlier was mostly in snap beans, corn, and peas. All other major vegetable packs also declined seasonally.

March 1 stocks of total meats were 634 million pounds, compared with 697 million a year earlier. Average holdings for the date are 602 million pounds. Total beef stocks declined 24 million pounds in February to 252 million pounds. Frozen pork holdings gained 4 million pounds during the month to total 263 million, but cured pork was down 1 million, totaling 28 million on March 1.

Veal and lamb and mutton holdings were also reduced during February and were below year-earlier stocks. Canned meats were up from a month earlier and year

earlier levels but below average for the date.

Holdings of <u>creamery butter</u> rose 9 million pounds to total 173 million on March 1. This gain was average for the month but 11 million pounds less than a year earlier.

Shell eggs totaled 76 thousand cases, compared with 53 thousand a year earlier and the average of 41 thousand. March 1 stocks were one thousand cases more than on February 1, in contrast to the 10-thousand case reduction during February 1967 and the average reduction of 32 thousand cases.

At mid-season, orange concentrate stocks were 47 million gallons, a gain of 3 million during February. This was 10 million gallons less than a year earlier and 4 million below average. Stocks, however, were 18 percent greater than a year earlier and 24 percent above average.

Public Warehouse Occupancy

Occupancy of public <u>freezer</u> rooms was 70 percent on March 1, down 4 percentage points from a month earlier but 1 point higher than a year earlier. Average occupancy is 65 percent. March 1 occupancy in the South Atlantic Region and Mountain Region was higher than on February 1 but less than a month earlier in other regions.

Occupancy of cooler rooms, at 57 percent on March 1, was 3 points less than a month earlier but 1 point higher than a year earlier and 4 points above average. Only the New England region had more cooler space in use on March 1 than a month earlier.

Cooler and Freezer Stock Changes

Cooler-held stocks declined 358 million pounds during February to 2.3 billion on March 1. Holdings of dried and evaporated fruits, peanuts, shell eggs, and canned meats increased during the month but stocks of other commodities decreased.

Stocks in <u>freezer</u> rooms declined 204 million pounds during February to 4.4 billion pounds. Stocks of eggs, poultry, fruits and vegetables, beef, veal, lamb and mutton were down from a month earlier and more than offset gains in cream, butter, juice, and pork.

Dairy Products

March 1 stocks of creamery butter totaled 173 million pounds, compared with 164 million a month earlier and 55 million a year earlier. Average stocks are 175 million pounds. Government-owned stocks accounted for 150 million pounds of the March 1 total. American cheese holdings declined 16 million pounds in February to 310 million, 2 million pounds more than a year earlier and 15 million more than average. Cream stocks totaled 8 million pounds on March 1 about the same as on February 1. Increased holdings of fluid cream were offset by decreased stocks of plastic cream.

Juices, Fruits and Vegetables

On March 1, frozen <u>orange concentrate</u> stocks totaled 47 million gallons, about 7 million more than a year earlier and 9 million above average. The February gain was 3 million gallons, compared with 13 million last year and the average of 7 million.

Warehouse holdings of <u>frozen fruits</u> were 434 million pounds on March 1, down 49 million from a month earlier. This seasonal reduction equalled the average February decline but 7 million pounds less than a year earlier.

Total <u>fruit</u> stocks were 8 percent lower than on March 1, 1967 but 3 percent above average. With the exception of frozen apples, stocks of fruit packs were lowered during February.

Holdings of frozen vegetables, excluding french fries, were 1,072 million pounds on March 1, a reduction of  $\overline{135}$  million from a month earlier. Stocks totaled 960 million pounds a year earlier. The average is 821 million.

French fries in storage increased 48 million pounds to 464 million pounds. Stocks were down 3 percent from a year earlier but 53 percent greater than average.

Meat Products

Warehouse stocks of meat totaled 634 million pounds on March 1, down 17 million from a month earlier and 63 million from a year earlier. Average March 1 stocks are 602 million pounds. Beef holdings declined 24 million pounds but stocks of pork and other meats increased 7 million. The beef inventory of 252 million pounds on March 1 was 19 percent less than a year earlier but 13 percent above average. Pork holdings totaled 291 million pounds on March 1. The 3-million pound increase during February compared with a 34-million increase a year earlier and the average February increase of 28 million. Canned meats rose 7 million pounds during the month.

Poultry and Poultry Products

Total <u>poultry</u> holdings were 459 million pounds on March 1, compared with 525 million a month earlier. The decline of 66 million pounds compared with 25 million pounds a year earlier and 44 million average. Total March 1 stocks were a record high for the date.

Turkey holdings were 312 million pounds on March 1, a record high for the date. During February holdings were reduced 49 million pounds compared with 18 million a year earlier. The average February decline is 27 million pounds.

Shell egg stocks increased one thousand cases during February to 76 thousand on March 1. Generally stocks decline during February. Last year, a 10-thousand case decline lowered holdings to 53 thousand and the average decline is 32 thousand cases. Average March 1 stocks are 41 thousand cases.

Frozen eggs totaled 80 million pounds, twice the stocks both of a year earlier and average. The decline of 5 million pounds during February was slightly less than average in contrast to the 4-million pound gain a year earlier.
